CAD/CAM Software

3Shape has introduced upgrades to its CliniCare program for Trios users. The Patient Specific Motion tool scans and records the patient's actual articulation, rather than estimating movements from still images. According to the manufacturer, this enables more tailored adjustments and treatments. The Treatment Simulator helps patients fully appreciate the benefits of treatment, since they can view predicted progress and final results on-screen and in color.

For more information, contact 3Shape North America, 10 Independence Blvd., Suite 150, Warren, NJ 07059. (908) 867-0144; www.3shapedental.com.

Data Hub

The Dentsply Sirona Hub data-storage unit automatically saves and backs up two copies of CAD/CAM data, making encrypted information readily available on any CEREC workstation in a network. The Hub also tracks open cases so each job's current status is readily available, according to the company. Patient data can be kept up-to-date, too, because the unit easily synchronizes with Sidexis.

For more information, contact Dentsply Sirona, 221 W. Philadelphia St., Suite 60W, York, PA 17401. (800) 877-0020; www.dentsplysirona.com.

Intraoral Scanners

Data from Planmeca Plan-Scan and Emerald scanners can now be conveniently and securely exported to the ClearCaps and ClearCorrect systems, according to the manufacturer. The scans can also be integrated into the Orchestra 3D software system for efficient file manipulation, design, and transfer.

For more information, contact Planmeca USA, Inc., 100 N. Gary Ave., Suite A, Roselle, IL 60172. (630) 529-2300; www.planmecausa.com.

3D Print Resin

VeriModel OS is the latest three-dimensional printer resin from Whip Mix. According to the manufacturer, this ivory-colored, methacrylate-based resin combines high resolution with durability and minimal shrinkage to produce dental models with a matte finish.

For more information, contact Whip Mix Corporation, 361 Farmington Ave., Louisville, KY 40209. (800) 626-5651; www.whipmix.com.
