## Aligner Software

Studio Pro 4.0, a new Web-based software for use with Reveal Clear Aligners, offers orthodontists a range of virtual tools to visualize, customize, and communicate treatment plans. The intuitive, easy-to-navigate interface is linked to the Reveal Aligners DDX Case Management Portal and was designed with clinicians in mind, according to the company. The software offers more than 25 new features, enabling providers to personalize treatment plans with greater ease and control.

For more information, contact Henry Schein Orthodontics, 1822 Aston Ave., Carlsbad, CA 92008. (800) 344-3397; [www.revealclearaligners.com/studio-pro.com](http://www.revealclearaligners.com/studio-pro.com).

## Handpiece

The Aeras Star 500 Elite offers the simplicity of one handpiece for all procedures. The handpiece features 39 watts of power, LED illumination, and a head optimally sized for patient comfort and posterior access. A multiport spray keeps the bur cool, and the swivel design with an anti-retraction valve prevents backflow to the dental delivery unit, according to the manufacturer. Lubricated and lube-free options are available.

For more information, contact DENTALEZ, 1816 Colonial Village Lane, Lancaster, PA 17601. (866) 383-4636; [www.dentalez.com](http://www.dentalez.com).

## Optical Loupe

The ergonomic Infinity VUE loupe keeps the wearer's chin up, neck straight, and eyes forward in viewing of the oral cavity, according to the manufacturer. Each unit is custom-built to the buyer's measurements and features precision-coated optics with 3.0x or 3.5x magnification. An HDi headlight of your choice can be added.

For more information, contact Designs for Vision, 4000 Veterans Memorial Highway, Bohemia, NY 11716. (800) 345-4009; [www.designsforvision.com](http://www.designsforvision.com)

## Aligner Material

GT FLEX Pro thermoforming sheets from Good Fit Technologies are engineered specifically for clear aligners and retainers. According to the company, the plastic offers superior strength for fracture resistance along with flexibility for comfort and tooth movement, without bubbling, cracking, or crazing. The material has a thin protective laminate on both sides, designed to stay in place during the thermoforming process. GT FLEX Pro sheets come in either a .8mm thickness for aligners or a 1mm thickness for retainers.

For more information, contact OrthoEssentials USA, 10 Lippincott Lane, Suite 6, Mount Holly, NJ 08060. (866) 517-3257; [www.orthoessentials.net](http://www.orthoessentials.net).
