

PRODUCT NEWS

Multilocation Platform

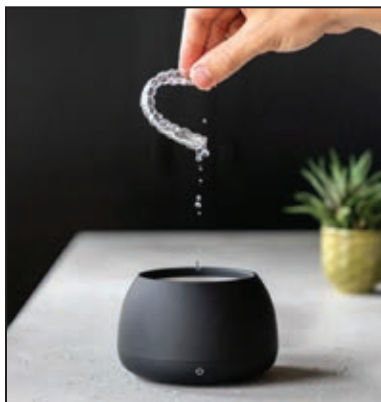

Weave has launched a new enterprise experience to help multilocation practices standardize operations, improve efficiency, and accelerate revenue-cycle management. According to the company, the single-platform practice-management software provides an easy way to consolidate phone services, manage forms and payments, and communicate across multiple practice locations. The service simplifies the daily tasks involved in managing an orthodontic practice, facilitating patient acquisition and retention.

For more information, contact Weave Communications, 1331 W. Powell Way, Lehi, UT 84043. (833) 572-2139; www.getweave.com.

Oral Appliance Cleaner

Designed to eliminate bacteria, viruses, and pathogens, the Dental Pod Pro is an advanced cleaning solution for oral appliances. According to the company, its patented design, ultrasonic technology, and user-friendly features provide effortless cleaning for oral appliances. In combination, the powerful cleaning capabilities and smarter features make patients' daily routine easier for improved maintenance of oral hygiene.

For more information, contact Zima Dental, 71-75 Shelton St., Covent Garden, London, U.K., WC2H 9JQ. www.zimadental.co.

Clear Aligner System

G&H Orthodontics has updated its Tune clear aligner system with new features to improve control over tooth movement and minimize treatment time, according to the company. The associated SmileStudio 1.1 software offers enhanced treatment-planning capabilities, with experts available to review each case. An efficient setup process allows practitioners to begin providing Tune aligners quickly, making an affordable, high-quality treatment option available to more patients.

For more information, contact G&H Orthodontics, 40 Linville Way, Franklin, IN 46131. (800) 526-1026; www.ghorthodontics.com.

Bonding Agent

Kerr Dental has introduced OptiBond Universal 360, the next generation of the company's OptiBond Universal bonding agent. The product features GPDM technology enriched with MDP monomers to offer reliable bond strength on all surfaces and substrates without the need for light-curing. According to the company, the one-bottle solution can be used with any etching technique for both direct and indirect restorations.

For more information, contact Kerr Dental, 200 S. Kraemer Blvd., Building E2, Brea, CA 92821. (800) 537-7123; www.kerrdental.com.
