

PRODUCT NEWS

Aligner Reminders

Aligner Reminders, a new software program co-created by an orthodontist and his software-designer patient, automates the process of reminding patients to change their clear aligners. Compatible with all major aligner brands, the software sends reminders via text or e-mail and offers a direct channel for patients to communicate with their orthodontists about aligner-related issues. According to the company, the platform is user-friendly and improves treatment adherence and outcomes.

For more information, contact AlignerReminders, 635 E. Maryland Ave., Phoenix, AZ 85012. (838) 848-8020; alignerreminders.com.

Oral Hygiene System

Waterpik has launched Sensonic Complete Care, combining the Sensonic toothbrush and Waterpik water flosser. According to the company, the system offers specialized flossing tips and PrecisionPulse technology, which enhances plaque removal and gum health, making it a highly effective tool for at-home oral care. Accepted by the American Dental Association, it has been shown to remove plaque around braces up to three times better than manual brushing and flossing.

For more information, contact Waterpik, 1730 E. Prospect Road, Fort Collins, CO 80553. (800) 525-2020; www.waterpik.com.

Dental Operating System

Planet DDS, a provider of cloud-based dental software solutions, has introduced DentalOS, the first dental operating system designed to address common concerns facing dental service organizations (DSOs). According to the company, DentalOS is designed to transform how DSOs and other groups integrate advanced technology and drive growth. The platform provides an open application programming interface that ensures seamless data flow, full interoperability between applications, and simple integration with in-house and third-party tools.

For more information, contact Planet DDS, 17872 Gillette Ave., Suite 250, Irvine, CA 92614. (800) 861-5098; www.planetdds.com.

CBCT Scanner

Owandy Radiology recently debuted the I-Max 3D XPro cone-beam computed tomography scanner. According to the company, it scans at resolutions up to 70µm, with a larger field of view, and features advanced AI processing for improved image quality. Available in wall- or column-mounted options, the device offers computer-aided design capabilities and can be easily integrated with practice-management programs.

For more information, contact Owandy Radiology North America, 585 Stewart Ave., Garden City, NY 11530. (516) 858-5695; www.owandy.com.
