Intraoral Camera

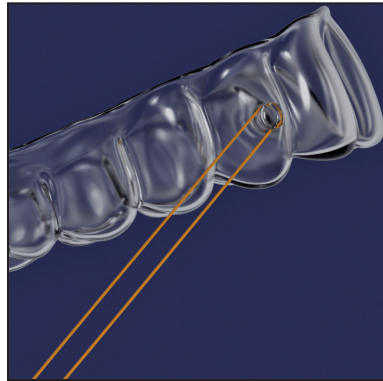

The CS 1300 intraoral camera by Carestream Dental delivers sharp, high-definition images to enhance patient communication. According to the company, the camera's intuitive handling, rotating head, and adaptive LED lighting make clear image capture fast and simple, while smooth integration with CS Imaging keeps practice workflow efficient and unified. HD imaging makes it easy to illustrate conditions to patients, helping guide informed decisions. USB connectivity allows for quick setup and sharing.

For more information, contact Carestream Dental, 3625 Cumberland Blvd., Ste. 700, Atlanta, GA 30339. (800) 944-6365; www.carestreamdental.com.

Integrated Buttons

OrthoFx recently launched FXIntegrated Buttons, the first buttons that are seamlessly formed into clear aligners, as prescribed by clinicians, during the manufacturing process. Unlike bonded buttons, FXIntegrated Buttons are formed as one continuous piece from the same polymer as the aligner. The company states that this innovation enhances treatment process efficiency, reduces chairtime, improves durability, and offers greater patient comfort and ease of elastic application.

For more information, contact OrthoFx, 48890 Milmont Drive, Suite 101D, Fremont, CA 94538. (415) 936-0006; www.orthofx.com.

AI Ceph Tracing

WebCeph software provides automated cephalometric tracing and analysis for dental professionals, offering a digital solution that optimizes workflow through AI and cloud technology. According to the company, AI-assisted cephalometric tracing and detailed analysis help orthodontic practices streamline diagnostic workflows, while ensuring clinical records are accessible anytime, anywhere. Practitioners can simulate orthodontic treatment and orthognathic surgery, then save the result as an image or video file.

For more information, contact WebCeph, 411-ho, 240, Pangyoyeok-ro, Bundang-gu, Seongnam-si, Gyeonggi-do, Republic of Korea. (+82) 31-697-0433; webceph.com.

Clear Brackets

DynaFlex recently introduced the Norris 20/26 Clear Bracket System, which offers the same advantages as the company's metal brackets, with the added benefit of a nearly invisible, tooth-colored appearance, enhancing esthetics and patient confidence. The company states that the clear system uses a passive self-ligating design to reduce friction and durable construction engineered to perform throughout treatment duration. The brackets also feature smooth, low-profile contours to enhance patient comfort.

For more information, contact DynaFlex, 8050 Hawk Ridge Trail, Lake St. Louis, MO 63367. (866) 346-5665; www.dynaflex.com.
